The Diapasons of Well-being

Fruitful cooperation between **Nature**
and **human intelligence**

Everything that lives, vibrates!

THE DIAPASONS OF **WELL-BEING**

Rebalancing (and more...)
in **40 days** by following
a natural evolutionary process

1

Adaptation

The first phase, about **3** days: The diapason adjusts to your body.
It is **adaptation**.

2

Transformation & emotional cleansing

The second phase, until the 21st day: the diapason accompanies
you for a **transformation** and an **emotional cleansing**
adapted to each one.

3

Repair & revitalization

The third phase, until the **40th** day:
the diapason promotes **repair** and
revitalization of your body.

The duration of the phases mentioned are basic mean values: they can fluctuate in function of constitution and the life situation of each individual.

There are **2** quantum resonance diapason devices :

- a) A diapason at **low frequencies** for the relation to the earth, anchoring or **horizontality**.
- b) A diapason at **high frequencies** for the relation to the sky, the **verticality**.

WHAT DO DIAPASONS CONTAIN ?

Bamboo : Chosen for its strength, exceptional resistance and rapid growth. In addition, it records quantum information for spreading it throughout the body.

DIAPASONS AT LOW FREQUENCIES (174-639 Hz), horizontality

The following symbols are incorporated respectively on the front and back of each "bamboo coin".

For women

Jasmine flower : Symbol of the **sacred feminine**, its name comes from the Persian "yasmin" which means "gift from God".

Jasmine is synonymous with purity, simplicity, modesty and strength.

For men

White Lion: Symbol of the sacred masculine, it embodies strength, security and benevolence, both towards himself and those around him.

It is a born leader.

Common men/women

Tao: It represents the **yin / yang balance** according to Chinese tradition.

DIAPASONS AT HIGH FREQUENCIES

(417-963 Hz), verticality

For women

Lotus flower. The lotus represents the elevation of the soul, first purely materialistic through its roots, then tasting the experience of water through its stem, to finally achieve enlightenment and awakening through its flower.

Intact in the face of impurity, the lotus symbolizes purity of heart and mind.

For men

White Lion: Symbol of the **sacred masculine**, it embodies strength, security and benevolence, both towards himself and those around him.

It is a born leader.

In addition, it symbolically characterizes the divine aspect present in each of us, and connects us to it.

Common men/women

Merkaba: Powerful geometric figure that, among other things, activates inactive areas of the brain (indeed, we only use 10% of our brain!).

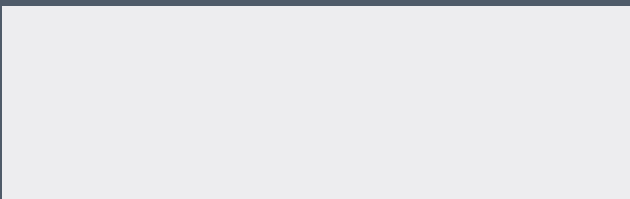

It would promote better communication between the left hemisphere (rational) and the right hemisphere (emotional).

Use of diapasons

Please keep 1 diapason of each type (high and low frequencies) with you (pendant, pocket, etc) during the day, and remove them during the evening and at night. It's as simple as that !

A word of advice: make sure you hydrate your body well in order to allow it to benefit as much as possible from the effects of these diapasons.

Your advisor
